ER/80

Super Concentrated Emulsion Remover

GENERAL DESCRIPTION

ER/80 is designed for removal of all photo polymer, diazo, and capillary film emulsions. ER/80 will immediately liquify and break down the emulsion. Dramatically increase the speed of the reclaim procedure. ER/80 contains proprietary detergents and boosters to increase penetrating power and performance.

ADVANTAGES

- Economical
- Easy to use
- Immediately breaks down emulsion
- Low Odor
- Safe on all types of mesh
- Non-Hazardous
- Biodegradable / Drain Safe
- Super Concentrated
- Ideal for use in all Automated Reclaiming Systems (will not crystallize, coagulate, or plug nozzles)
- Ideal for use in dip tank applications

Quick Tip:

Use a dilution that has plenty strength to break down the emulsion.

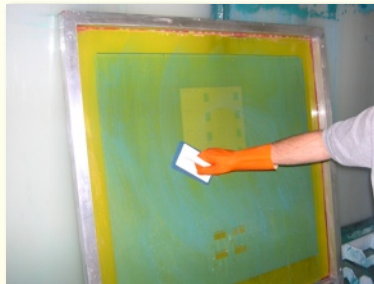

Emulsions, that are not properly broken down, will leave excessive residue on the mesh.

Application

ER/80 can be used in concentrated form, or it can be diluted up to 1 to 30 parts of water. ER/80 can be applied by a sponge, pad, spray bottle, dip tank, or pneumatic pump systems.

Step 1. After removal of ink, block-out, and tape, apply ER/80 to a wet screen(both sides).

Step 2. Scrub screen with non-abrasive pad or brush.

Step 3. High pressure rinse - starting at bottom.
