

FEATURES

- 720* Softhand Clear is a super clear, curable extender base plastisol.
- This product is formulated to soften, extend and increase the flow characteristics of most plastisol inks.

*Lead Compliant (Contains less than 90 ppm lead)

Application & Storage Information

<p>HOW TO USE</p>	<p>720 Softhand can be added to 700 Series, Multipurpose, 1100 Series, 7600 Series and 800 Series inks for improved hand, cost and printability. 720 is very clear and is highly recommended for extending any process color, especially the Pro-Brite™ Process Colors.</p> <p>For a softer hand, add approximately 10% to 20%, by volume, of 720 Softhand Clear. More may be added, if necessary, without affecting the cure or fusing of the mixed ink. The more Softhand added, the less opaque the mixed ink will be.</p> <p>Using the 720 Softhand in 800 Series inks to print on light colored fabrics greatly lowers the cost of the mixed ink. Adding 720 Softhand to 800 Series inks in amounts higher than 20%, by volume, may shift mixed Pantone colors.</p> <p>NOTE: The addition of 720 Softhand Clear reduces the bleed resistance of low bleed inks.</p>
<p>CURE TEMPERATURE</p>	<p>325°F (163°C) Entire ink film. Fusion temperature may vary, depending on which inks 720 Softhand is mixed into.</p> <p>Since plastisols do not air dry, they must be fused with an appropriate heat source in order to achieve durability. The optimum time/temperature cycle will vary with the amount of ink deposited, fabric and the type of heat source used. Plastisols actually achieve the proper fusion point as soon as the innermost section of the ink film reaches the prescribed temperature. Test dryer temperatures before a production run. Wash test printed product before production run.</p>
<p>CLEAN-UP</p>	<p>Any environmentally friendly plastisol screen wash.</p>
<p>STORAGE OF INK CONTAINERS</p>	<p>Keep inks indoor and store in a cool area. Recommend storage at 65°F to 90°F (18°C to 32°C). Avoid storage in direct sunlight or in extreme temperature conditions.</p>

720 SOFTHAND CLEAR BASE

Recommendations and statements made are based on International Coatings' research and experience. Since International Coatings does not have any control over the conditions of use or storage of the product sold, International Coatings cannot guarantee the results obtained through use of its products. All products are sold and samples given without any representation of warranty, expressed or implied, of fitness for any particular purpose or otherwise, and upon condition that the buyer shall determine the suitability of the product for its own purpose. This applies also where rights of third parties are involved. It does not release the user from the obligation to test the suitability of the product for the intended purpose and application.
