Screen Frame Clamping System with Micro-Registration

Big Gripper™

Shown with optional Accu-Glide™ Aluminum Vacuum Table, frame and SideKick™ frame lifting mechanism.

ADVANTAGES

- Clamps hold large and small frames up to 3" high
- Holds square and round (roller) frames
- Machined for tolerance pivot and precise registration
- Hardened aluminum body and steel pivotal shaft
- Mount clamps to any printing base or table using only two drilled bolt holes
- Off-contact is easily adjusted
- Individual clamps and shaft mounted units available

A.W.T.'s Big Gripper™ heavy-duty screen holding clamp is used with wood and metal frames of all shapes and sizes. The swivel locking clamp pad tightly grips square and round frames to ensure rigidity. The Big Gripper is precision machined to ensure accurate pivoting and close tolerance for print repeatability with strict registration. The standard Big Gripper holds frames from a minimum of one inch high to a maximum of three inches. For shorter frames, inquire about our specially made, custom sized studs. The Big Gripper is used for single and multicolor jobs. Available per clamp or per pair, each gripper mounts individually.
